**GREEN OASIS' RESIDENTIAL AND  
ACREAGE SERVICES ARE A SMART  
CHOICE TO ENSURE A HEALTHY  
LAWN AND YARD.**

## DEEP CORE AERATION

Deep Core Aeration removes small plugs of thatch and soil from the lawn, allowing your lawn to breathe. These plugs are then left on your lawn to decompose, with the holes filling in within a few weeks, depending on time of year, weather and soil conditions. Deep Core Aeration is recommended once per year, in the Spring or Fall.

Benefits of Deep Core Aeration:

- \* Improves air exchange
- \* Enhances uptake of water and fertilizer by the soil
- \* Reduces water run-off and puddling
- \* Creates stronger turfgrass roots
- \* Reduces soil compaction
- \* Increases tolerance to stress brought on by heat and drought
- \* Enhances thatch breakdown

We also offer the following services: Fertilizer and Weed Control Packages; Fertilizer, Weed Control or Vegetation Control; Tree and Shrub Deep Root Fertilization; Spring and Fall Clean Ups; Mowing; and Soil Drench – Insect/Disease Management.

Please contact your local office for a quote based on your property's square footage.
