TREE & SHRUB DEEP ROOT FERTILIZATION

Your largest landscape investment is often your trees and shrubs. Help them to look healthy and lush and to achieve their full growth potential, with Deep Root Fertilization. *Your trees and shrubs will thank you.*

Deep Root Fertilization is recommended twice per year, in the spring and fall, and provides your trees and shrubs with essential nutrients. With Deep Root Fertilization, nutrients go directly to the roots, making them easily available for tree and shrub intake. Our liquid soil injection feedings are designed to assist in keeping your trees and shrubs healthy, strong and beautiful and are an essential component for proper plant health. Our specially blended fertilizers consist of a combination of micro and macro nutrients to help guard your trees and shrubs from nutrient deficiencies.

Benefits of Deep Root Fertilization include:

- * Creates spectacular foliage
- * Encourages new growth
- * Improves overall health of trees and shrubs
- * Helps trees and shrubs withstand the harsh Alberta climate better

Spring Deep Root Fertilization: Mid to late April and May

This application provides the plant with the necessary blend of nutrients in the Spring for healthy growth and provides increased resistance to disease and pests.

Fall Deep Root Fertilization: Mid September to late October

This application will increase the plant's ability to produce and store energy reserves before freeze-up and will assist with Winter hardiness.

Please contact your local office for an estimate. Treatment service is based on a site visit charge plus fee per tree and shrub.
